### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-9 and 13-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Weder (5111613).

Weder relates to a method for providing decorative polymeric ribbon material. The method comprises providing a flexible sheet of polymeric material and cutting the sheet into strips that can be wrapped about an item. The sheet may be a single layer or multi-layered (col. 3, lines 28-30). The thickness is 1.0- 2.5 mils (col. 3, lines 36-42). Further, in col. 3, line 64 to col. 4, line 3, Weder relates to a method of embossing and/or printing the sheet. However, Weder fails to teach that the sheet simulates texture or appearance of paper. It would have been obvious to one having ordinary skill in the art to modify Weder by providing the texture and/or appearance of paper to the polymeric sheet because both the material and the process of forming the embossed structure are the same and hence, it would obviously provide the sheet with simulation and/or appearance of paper.

3. Claims 12 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Weder in view of the English abstract of Japanese: 74029902 B.

Weder, as discussed above, fails to teach that the sheet is an expanded core film. The English abstract of Japanese: 74029902 B discloses a foamed sheet that is embossed to exhibit paper-like characteristics. Therefore, it would have been obvious to one having ordinary skill in the art to utilize the English abstract's teaching or using foamed sheet in the invention of Weder to provide for embossed sheet having paper-like characteristics with the motivation to impart aesthetic appeal.

#### ***Allowable Subject Matter***

4. Claims 10-11 and 22-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art uncovered so far fails to teach the printing with matted or foamable ink and lacquered with matted or foamable lacquer.

#### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nasser Ahmad whose telephone number is 571-272-1487. The examiner can normally be reached on 7:30 AM to 5:00 PM, and on alternate Friday.
